Detailed Office Action

Unity of Invention: Multiple Inventions

This application was filed under 35 U.S.C. § 371 and is subject to unity of invention practice pursuant to 35 U.S.C. § 121 and 372. The regulations governing the claiming of different inventions in one national application are set forth under 37 C.F.R. § 1.141, 1.475, and 1.499. Applicants are reminded that if multiple products, processes of manufacture, or uses are claimed, the first invention of the category first mentioned in the claims of the application and the first recited invention of each of the other categories related thereto, will be considered as the main invention in the claims (refer to PCT Article 17(3)(a) and § 1.476(c)). This application contains the following inventions or groups of inventions which are not so linked as to form a single inventive concept under PCT Rule 13.1. In accordance with 37 C.F.R. § 1.499, applicant(s) is/are required, in response to this action, to elect a single invention to which the claims must be restricted.

- a. Group I, claim(s) 1-14 and 28-31, drawn to isolated polynucleotides encoding Tal.
- b. Group II, claim(s) 15-24 and 32-41, drawn to isolated Tal polypeptides.
- c. Group III, claim(s) 25 and 26, drawn to an anti-Tal antibody.
- d. Group IV, claim(s) 27, drawn to a display library comprising Tal polypeptides.
- e. Group V, claim(s) 42-53, drawn to a method of treating HIV infection by administering a Tal polypeptide.

- f. Group VI, claim(s) 54-81, drawn to nucleic acid construct encoding two different polypeptides (e.g., Tal and Tsg101).
- g. Group VII, claim(s) 82-88, drawn to method of treating HIV infection by down-regulating Tal expression by administering a ribozyme, antisense, or small interfering RNA.
- h. Group VIII, claim(s) 82,83, and 89, drawn to a method of treating HIV infection by down-regulating Tal expression through the administration of anti-Tal antibodies.

The inventions listed as Groups I-VII do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Concerning Groups I-IV and VI, each of the identified groups is directed toward a structurally/functionally distinct product. Concerning Groups V, VI, and VIII, each of the identified groups employs different scientific reagents and protocols.

Applicants are advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Applicants are also advised that the claims should be amended, where necessary, to reflect the restriction requirement and election.

37 C.F.R. § 1.48(b)

to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
